

Spectrum Controls Office Renovation

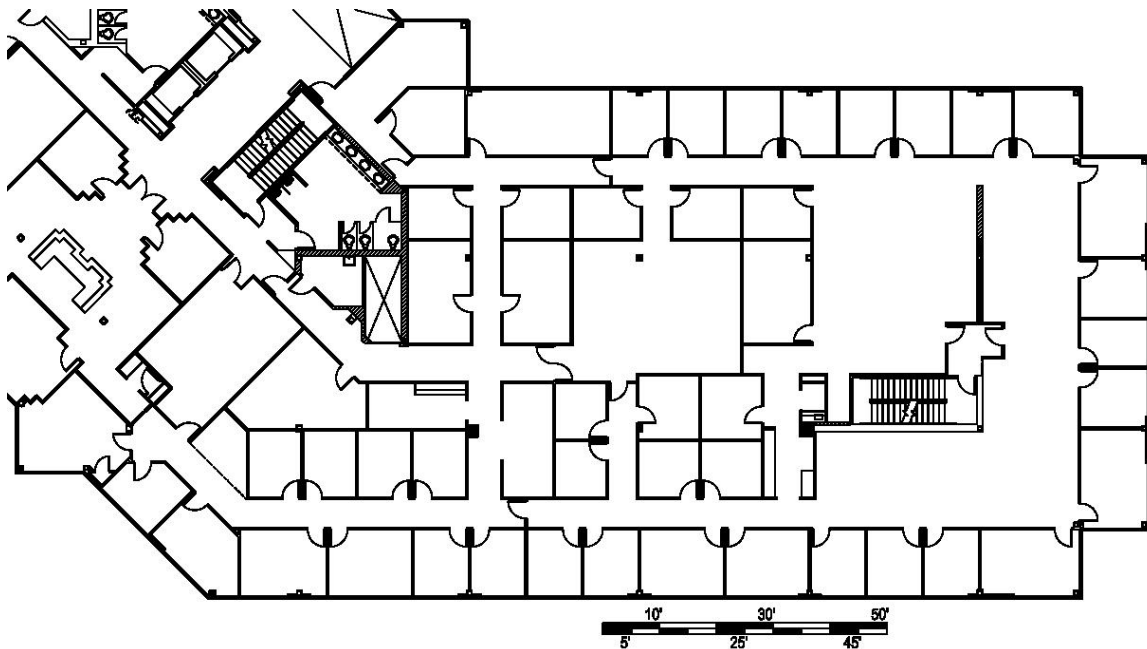

2004

Exterior of Building

We assisted a computer controls corporation in its move into a new office building in Issaquah. The project was a 30,000 square foot tenant improvement on two floors.

Spectrum has four divisions – Sales & Marketing; Engineering; Manufacture; and Corporate Offices. The tenant improvement involved minor upgrades to an existing office floor; and significant alterations of another floor for light manufacture, testing, shipping and receiving.

Second Floor Final Layout
