CONTENTS

Preface v

1 Basic Circuit Elements 1

Resistance · Voltage, Current, Power · Direction of Current Flow · Alternating Current · Nonlinear Resistors · Inductance · Inductance in a D-C Circuit · Inductance in an A-C Circuit · Capacitance · Capacitance in a D-C Circuit · Capacitive Reactance · Inductance and Capacitance Compared · Resonance · Series Resonance · Parallel Resonant Circuit · RC Circuits · Condenser Discharge · Time Constant · Time-constant Chart · Time Relations in RC Circuits · Waveforms in RC Circuits · Inductor Applications

2 Fundamentals of Tubes 24

Tube Classifications · Vacuum and Gas Tubes · Tube Characteristics · Thermionic Tubes · Electron Speed · The Two-element Tube · Tube Resistance · Space Charge · The Triode · Grid Control · Tube Curves · Use of Tube Curves · Grid Control of Gas Tubes · Voltage-regulator Tubes · Multielement Tubes · Cathode-ray Tubes · Beam Deflection · Light-sensitive Devices · Phototubes · Gas Phototubes · Multiplier Phototubes · Photoconductive Tubes · Photovoltaic Tubes

3 Basic Tube Circuits 47

Tubes as Rectifiers · The Tube as an Amplifier · Classes of Amplification · Grid-bias Source · Load Line · Phase Reversal in Vacuum-tube Amplifiers · Relay Operation · Tube Parameters · Transconductance · Plate Resistance · Amplification Factor · Typical Amplifier Problem · Impedance Matching · Power Output · Cathode Follower · Multistage Amplifiers · Cascade Circuits · Interstage Coupling · Wave-changing Circuits · Limiters · Clampers · Discriminator · D-C Amplifiers · Negative Feedback · Oscillators · The Tube as an Oscillator · Effect of Time Constant · Detection, Modulation · Detector · Modulation · Mixers · Vacuum-tube Voltmeters · D-C Measurements · A-C Measurements · Other Voltmeter Types

4 Rectifiers and Power Supplies 86

Rectifier Circuits · Full-wave Rectifier · Current Required and Choice of Circuit · Filter Circuits · Bleeder Resistors · Filter-circuit Design · Selection of Power-supply Components · Choosing a Circuit · Reducing Charging Current · Choosing a Power Transformer · Color Coding · Choice of Tubes · Choice of Filter Condensers · Selection of Filter Chokes · Choice of Bleeder Resistors · Voltage Division · Electronic Voltage Regulators · Glow-discharge Voltage Regulators · Variable-voltage Regulator · Series or Degenerative Voltage Regulators · Combination Voltage Regulators · Simple Degenerative Voltage Regulator · Triode-pentode Regulator · Wide-range Voltage Regulator · Dry or Metallic Rectifiers · Disk Construction · Disk Characteristics · Efficiency · Operation · Overload Effects · Stand-by Service · Typical Circuits · General Comparisons · High-voltage Power Supplies · 60-cycle Power Supply · R-F High-voltage Supplies · Pulse-type High-voltage Supplies · Charged Capacitor Supplies · 900 Volts—0 to 4 Microamperes · Adjustable Output 60-cycle Supply · D-C Power for Portable Equipment · Voltage-multiplier Circuits

5 Light-sensitive Tubes 137

Value of Light-sensitive Tubes · Types of Light-sensitive Tubes · Photoelectricity · Fundamentals of the Phototube · Gas versus Vacuum Tubes · Phototube Ratings · Phototube Circuit Design · Phototube Circuits · Phototube-relay Circuits · Simple Thyration Circuit for Phototubes · Phototube-amplifier-thyratron Circuit · Other Simple Phototube Circuits · Remote Coupling to Phototube · Multiplier Phototubes · Multiplier Phototube Circuits · Stabilized Control · Avoiding D-C Amplification · Light-chopper Systems · Light Comparison · Unusual Phototube Applications · Frequency Measurement · Simplified Television · Waveform Generators · Sound Reproduction

6 Thyratron Tube Circuits 169

Thyratron Characteristics · Comparison of Vapor and Gas-filled Tubes · Temperature Effect · Tube Types · Shield-grid Thyratrons · Methods of Rating Three-element Gas Tubes · Cathode Protection · Controlling Anode Current · Control by Direct Current · A Self-stopping D-C Circuit · Vacuum-tube Control of Gas Tube · Tube-controlled Circuit · Phase Control of Anode Current · Circuits for Obtaining Phase Control · Current

Control by Transformer and Phase Shift · Bridge Circuit Phase Control · Thyratrons as Switches · Controlled Rectifiers as Relays · The Inverter · The Inversion Process · Single-tube Inverter Applications · The Ignitron

7 Relays and Relay Circuits 197

Relay Terms · Relay Symbols · Contact Arcing · A-C versus D-C Relays · Resonant Relays · D-C Relay Operation · Time-delay Relays · Uses of Time-delay Relays · Fail-safe Operation · Supersensitive D-C Relays · Applications of Supersensitive Relays · Sensitive Relays · Sensitive Relay Adjustments · Relays in Vacuum-tube Circuits · Special Relays · Care of Relays · Capacity Relay Circuit · R-F Operated Remote-control Relay

8 Electronic Motor Control 216

D-C Shunt-motor Control · Shunt-motor Theory Review · Speed Control · Typical Speed-control Circuit · Phase-shifting Methods · Saturable Reactor Phase Shifter · Variation of Resistance · Continuous Control · Speed Regulation · IR-drop Compensation · Motor Reversing · Additional Refinements · Reversible Motor Control · Tachometer Speed Regulation

9 Electronic Measurement and Control 234

The Electronic Measuring Stick · Measuring Light Intensity · Dimension Control · Thickness Gauges and Controls · Radioactive Thickness Gauge · Ultrasonic Applications · Portable Ultrasonic Thickness Gauge · X-ray Thickness Gauge · Contact Thickness Gauge · Loop Control · Wire or Tube Thickness · Reluctance Thickness Gauge · Elevator Leveling · Register Control · Photoelectric Contour Tracer · Mechanical Motion Gauging · Differential Transformers · Resistance Motion Gauges · Strain Gauges · Resistance-measuring Circuits · Wheatstone-bridge Circuit · Differential Resistance Gauges · Compensation for IR Drop · RCA Triode Transducer · Power-line Fault Locator · Measuring Commutator Roughness · Watch-tick Amplifier · Temperature Measurement · Thermocouples · Resistance Thermometers · Bimetallic Strips · Radiation Pyrometers · Electronic Control · Phototube System · Self-balancing Potentiometers · Gas-tube Voltmeter · Tube Control of Wire Drawing · Conveyor Synchronization · Electron-tube Impact Meter · Floating Grid Circuit · Illumination Control · The Feedback Circuit

10 Counters and Divider Circuits 289

Electronic Counters · Pulse Generators · Counter Applications · Basic Circuits · Eccles-Jordan Pair · Triggering · Failure to Trigger · Counter Output · Pentode Trigger Circuit · Thyratron Counters · Ring Counters · The Binary Decade · Count Indication · Gas-tube Counters · Another Decade Unit · Ring-of-three Counter · Plug-in Counters · The Multivibrator · Synchronization of Multivibrators · Single-shot Multivibrators · Single-shot Applications · Step-type Counter · Pulse Amplifiers

11 High-Frequency Heating and Welding 327

Electronic Heating · Induction Heating · Frequency · Hysteresis Effect · Work-coil Design · Dielectric Heating · Modern Applications · Fundamental Theory of Dielectric Heating · High-frequency Generating Circuits · Electronic Welding Control · Resistance Welding · Types of Welding · Power Source · Welder Control · Ignitron Circuit · Synchronous and Asynchronous Control · Capacitor Discharge Welder
