

TABLE OF CONTENTS

Chapter 1. Introduction	11
SECTION 1. EMERGING TECHNOLOGY STRATEGIES	15
Chapter 2. Overview of Emerging Technology	16
2.1 Definition of Emerging Technology	16
2.2 Importance of Emerging Technology	16
2.3 Key Software Issues	16
2.4 Business Benefits	17
2.5 Risks Associated with Emerging Technology	17
2.6 Different Stages	17
2.7 Transitions and Roadblocks	18
2.8 Multiple Technology Suites	19
2.9 Different Corporate Viewpoints on New Technology	19
2.10 Evaluation Process and Template	19
Chapter 3. History of Emerging Technologies	20
3.1 Expert Systems	20
3.2 Integrated CASE Tools	21
3.3 World Wide Web	22
3.4 General Purpose Programming Languages	23
3.5 Middleware	24
3.6 Databases	26
3.7 Desktop Operating Systems	26
3.8 Networking Standards	27
3.9 Data Access Standards	28
3.10 Component Standards	29
3.11 Summary of Lessons Learned	30
3.12 References	30
Chapter 4. Evaluation Template for Emerging Technologies	35
(1) Overview	35
(2) Role	35
(3) Technical and Business Value	35
(4) Commercial Maturity	36
(5) Planning for Production	37
(6) Future Directions	37
(7) Overall Assessment Summary	38
SECTION 2 - GREAT GLOBAL GRID	39
Chapter 5. Overview of Great Global Grid Technologies	40
Chapter 6. Application Servers and Portals	45

6.1	Overview	46
6.2	Role in the Great Global Grid	47
6.3	Technical and Business Value	47
6.3.1	Technology scope	47
6.3.2	Business value vision	48
6.3.3	Specific application areas and benefits	49
6.4	Commercial Maturity	49
6.4.1	Status of standards	49
6.4.2	Suppliers in specific application areas	50
6.4.2.1	Java application servers	50
6.4.2.2	Microsoft	56
6.4.2.3	B2E portals and content management	56
6.4.2.4	B2C portals and commerce servers	60
6.4.2.5	B2B portals and marketplaces	61
6.4.3	Production deployment examples	63
6.5	Planning for Production	63
6.5.1	Leading technology approaches	63
6.5.1.1	Microsoft DNA	63
6.5.1.2	J2EE	65
6.5.2	Comparison of approaches	69
6.5.3	Critical factors for implementation	70
6.6	Future Directions	71
6.6.1	Open issues	71
6.6.2	Future technical enhancements	71
6.6.3	Future business applications	74
6.7	Overall Assessment Summary	74
6.7.1	Benefits	75
6.7.2	Risks	75
6.7.3	Recommendations	75
6.8	References	76

Chapter 7. Enterprise Application Integration and B2B Middleware82

7.1	Overview	83
7.2	Role in the Great Global Grid	84
7.3	Technical and Business Value	84
7.3.1	Technology scope	85
7.3.2	Business value vision	87
7.3.3	Specific application areas and benefits	88
7.4	Commercial Maturity	88
7.4.1	Status of standards	89
7.4.2	Suppliers in specific application areas	90
7.4.2.1	EAI and B2Bi products	91
7.4.2.2	JMS frameworks	96
7.4.2.3	Workflow	98
7.4.3	Production deployment examples	99
7.5	Planning for Production	99

7.5.1	Leading technology approaches	99
7.5.1.1	Message buses	101
7.5.1.2	Hubs	102
7.5.1.2.1	Microsoft BizTalk Server	102
7.5.1.2.2	IBM WebSphere Business Integrator	104
7.5.2	Comparison of approaches	106
7.5.3	Critical factors for implementation	107
7.6	Future Directions	107
7.6.1	Open issues	107
7.6.2	Future technical enhancements	107
7.6.3	Future business applications	110
7.7	Overall Assessment Summary	111
7.7.1	Benefits	112
7.7.2	Risks	112
7.7.3	Recommendations	112
7.8	References	112

Chapter 8. Web Services and XML Messaging119

8.1	Overview	119
8.2	Role in the Great Global Grid	121
8.3	Technical and Business Value	122
8.3.1	Technology scope	122
8.3.2	Business value vision	123
8.3.3	Specific application areas and benefits	123
8.4	Commercial Maturity	124
8.4.1	Status of standards	124
8.4.1.1	SOAP, WSDL, UDDI	125
8.4.1.2	B2B infrastructure	126
8.4.1.3	Security	129
8.4.1.4	Possible future standards	130
8.4.2	Suppliers in specific application areas	131
8.4.2.1	Extensions of existing systems	131
8.4.2.1.1	Application server and portal Web Services extensions	132
8.4.2.1.2	EAI and B2Bi Web Services extensions	132
8.4.2.2	Composite Web Services	133
8.4.2.2.1	Brokering and management	133
8.4.2.2.2	Aggregation	136
8.4.2.2.3	Orchestration	137
8.4.2.3	Web Services Networks	140
8.4.2.3.1	Transactional messaging	140
8.4.2.3.2	Event-driven peer communication	143
8.4.3	Production deployment examples	145
8.5	Planning for Production	145
8.5.1	Leading technology approaches	146
8.5.1.1	Microsoft .NET	146
8.5.1.2	Java Web Services	148

- 8.5.2 Comparison of approaches 150
- 8.5.3 Critical factors for implementation 151
- 8.6 Future Directions 152
 - 8.6.1 Open issues 152
 - 8.6.2 Future technical enhancements 152
 - 8.6.3 Future business applications 155
- 8.7 Overall Assessment Summary 155
 - 8.7.1 Benefits 156
 - 8.7.2 Risks 156
 - 8.7.3 Recommendations 157
- 8.8 References 157

Chapter 9 Peer-to-Peer Collaboration165

- 9.1 Overview 165
- 9.2 Role in the Great Global Grid 166
- 9.3 Technical and Business Value 167
 - 9.3.1 Technology scope 167
 - 9.3.2 Business value vision 168
 - 9.3.3 Specific application areas and benefits 168
- 9.4 Commercial Maturity 169
 - 9.4.1 Status of standards 169
 - 9.4.2 Suppliers in specific application areas 169
 - 9.4.2.1 Instant messaging and notification 169
 - 9.4.2.2 Peer-to-peer Web Services 172
 - 9.4.2.3 File searching, sharing and caching 172
 - 9.4.2.4 Collaboration 174
 - 9.4.3 Production deployment examples 177
- 9.5 Planning for Production 177
 - 9.5.1 Leading technology approaches 178
 - 9.5.1.1 Server-based example 179
 - 9.5.1.2 Server-assisted example 180
 - 9.5.1.3 Pure peer-to-peer example 182
 - 9.5.2 Comparison of approaches 185
 - 9.5.3 Critical factors for implementation 185
- 9.6 Future Directions 185
 - 9.6.1 Open issues 185
 - 9.6.2 Future technical enhancements 185
 - 9.6.3 Future business applications 188
- 9.7 Overall Assessment Summary 189
 - 9.7.1 Benefits 190
 - 9.7.2 Risks 190
 - 9.7.3 Recommendations 191
- 9.8 References 191

Chapter 10. Pervasive Computing: Middleware and Software Platforms197

- 10.1 Overview 198

10.2	Role in the Great Global Grid	199
10.3	Technical and Business Value	199
10.3.1	Technology scope	199
10.3.1.1	Wireless middleware for devices	200
10.3.1.2	Software platforms for devices	201
10.3.2	Business value vision	201
10.3.3	Specific application areas and benefits	201
10.3.3.1	Wireless middleware benefits	201
10.3.3.2	Software platform benefits	202
10.4	Commercial Maturity	202
10.4.1	Status of standards	202
10.4.1.1	Wireless middleware standards	202
10.4.1.2	Software platforms standards	207
10.4.2	Suppliers in specific application areas	209
10.4.2.1	Wireless middleware applications	209
10.4.2.1.1	Messaging and collaboration applications	209
10.4.2.1.2	Data and service access applications	211
10.4.2.2	Software platform applications	216
10.4.2.2.1	Device Client Software	216
10.4.2.2.2	Device Server Software	217
10.4.3	Production deployment examples	219
10.5	Planning for Production	219
10.5.1	Leading technology approaches	220
10.5.1.1	Java end-to-end	220
10.5.1.1.1	Java wireless middleware	221
10.5.1.1.2	J2ME device software platforms	223
10.5.1.2	Microsoft end-to-end	225
10.5.1.2.1	Middleware	225
10.5.1.2.2	Windows device software platforms	226
10.5.2	Comparison of approaches	226
10.5.3	Critical factors for implementation	227
10.6	Future Directions	227
10.6.1	Open issues	228
10.6.2	Future technical enhancements	228
10.6.3	Future business applications	230
10.7	Overall Assessment Summary	231
10.7.1	Benefits	232
10.7.2	Risks	232
10.7.3	Recommendations	232
10.8	References	233

Chapter 11. Distributed Resource Managers, Clusters, and Grids241	
11.1	Overview	242
11.2	Role in the Great Global Grid	243
11.3	Technical and Business Value	244
11.3.1	Technology scope	244

11.3.2	Business value vision	245
11.3.3	Specific application areas and benefits	245
11.4	Commercial Maturity	246
11.4.1	Status of standards	246
11.4.2	Suppliers in specific application areas	248
11.4.2.1	Tightly coupled dedicated clusters	249
11.4.2.2	Edge servers for increased performance	250
11.4.2.3	Cost effective virtual clusters	252
11.4.2.4	Peer clusters for highly parallel applications	253
11.4.3	Production deployment examples	255
11.5	Planning for Production	256
11.5.1	Leading technology approaches	256
11.5.1.1	Sun	256
11.5.1.2	IBM	257
11.5.1.3	Platform Technology	258
11.5.2	Comparison of approaches	259
11.5.3	Critical factors for implementation	260
11.6	Future Directions	260
11.6.1	Open issues	260
11.6.2	Future technical enhancements	261
11.6.2.1	Blade servers	261
11.6.2.2	Cluster integration extensions	261
11.6.2.3	Computing fabrics	262
11.6.3	Future business applications	263
11.6.3.1	Utility data centers	264
11.6.3.2	Portal interfaces to clusters	266
11.7	Overall Assessment Summary	267
11.7.1	Benefits	268
11.7.2	Risks	268
11.7.3	Recommendations	268
11.8	References	269

Chapter 12. Global Grid Middleware276

12.1	Overview	276
12.2	Role in the Great Global Grid	277
12.3	Technical and Business Value	278
12.3.1	Technology scope	278
12.3.2	Business value vision	279
12.3.3	Specific application areas and benefits	280
12.4	Commercial Maturity	281
12.4.1	Status of standards	281
12.4.2	Suppliers in specific application areas	283
12.4.3	Production deployment examples	284
12.5	Planning for Production	285
12.5.1	Leading technology approaches	285
12.5.1.1	Toolkit	285

12.5.1.2 Framework	287
12.5.2 Comparison of approaches	289
12.5.3 Critical factors for implementation	289
12.6 Future Directions	290
12.6.1 Open issues	290
12.6.2 Future technical enhancements	290
12.6.3 Future business applications	294
12.7 Overall Assessment Summary	295
12.7.1 Benefits	296
12.7.2 Risks	296
12.7.3 Recommendations	297
12.8 References	297
Chapter 13. Conclusions for the Future	303
13.1 Application Servers and Portals (Chapter 6)	303
13.2 Enterprise Application Integration and B2B Middleware (Chapter 7)	303
13.3 Web Services (Chapter 8)	304
13.4 Peer-to-Peer Collaboration Architectures (Chapter 9)	304
13.5 Middleware for Internet Enabled Devices (Chapter 10)	304
13.6 Distributed Resource Management and Clustering (Chapter 11)	305
13.7 Global Grid System Software (Chapter 12)	305
13.8 Future Technologies and Applications	305
APPENDICES	307
Appendix A. Glossary	308
Appendix B. Vendors Index	338
Appendix C. Standards Groups Index	342
Appendix D. Open Source Links	343
Index	346
