SALES TRAINING

COMPUTER-BASED LEARNING SYSTEM

UROLOGY: CKD

My responsibilities were:

-  Researched chronic kidney disease
-  Developed module objectives
-  Wrote content copy, pre- and post-tests

Module 4. Chronic Kidney Disease

Pretest

This pretest will help you determine what level of knowledge you currently have with respect to understanding chronic kidney disease. Don't worry if you don't know all of the answers. The material covered in the pretest is covered in the module. Use the results of the pretest to help you pinpoint the areas of learning on which you need to concentrate.

(answers denoted by *)

1. Chronic refers to
 - a. occurring quickly
 - b. happening on a sporadic basis*
 - c. happening chronologically
 - d. having to do with time
2. Kidney disease affects
 - a. the cardiovascular system
 - b. the urinary system
 - c. both of the above*
 - d. neither of the above
3. Erythropoietin is produced in the
 - a. bone marrow
 - b. kidney*
 - c. immune system
 - d. pancreas
4. The glomerulus is found
 - a. in the heart
 - b. in the bladder
 - c. in the liver
 - d. in the kidney*
5. Sclerosis means
 - a. necrosis
 - b. nonfunctioning
 - c. scarring or hardening*
 - d. narrowing
6. Extrarenal means
 - a. an excess of waste
 - b. outside the kidney*
 - c. inside the kidney

Module 4. Chronic Kidney Disease

Objectives

After completing this module you will be able to:

- Describe the interrelationship between the cardiovascular system and the urinary system
- Explain why a loss of kidney function profoundly affects other body systems
- List the symptoms of chronic kidney disease
- Match laboratory tests with their values
- Differentiate among the various causes of chronic kidney disease
- List the complications of chronic kidney disease

Module 4. Chronic Kidney Disease

- Preface
- Instructions
- Pretest (1-20)
- Pretest Answers
- Objections
- Course Content
- Review Test (1-20)
- Review Test Answers

Preface

Welcome to Module 5 of the Intermediate Nephrology Training Program. This computer-based learning system is designed as a self-directed experience to enhance your knowledge of Chronic Kidney Disease. It is especially focused to teach you about the implications of the disease. Because this is a progressive, noncurable disease, you'll notice an emphasis on diagnostic testing and monitoring of the condition. In addition, you'll see information about the National Kidney Foundation Initiative with links to their web site for more information. By understanding chronic kidney disease you will understand how this disease directly affects the early renal insufficiency market.

volume:

hypertension – abnormally high blood pressure, an increase in the force against arteries as blood circulates through them.
