Professional Experience

Long Term Positions:

- Principal Scientist, Governance Program, CIFOR. Conducting and coordinating research, analysis and writing pertaining to adaptive collaborative management, governance issues in/near forests, and gender and health in a number of countries; mentoring of junior staff, partners and graduate students; representing CIFOR in international fora. Current focus on gender, biodiversity, decentralization and forest and health, globally (specifically, responsible for CIFOR's Rights and Resources Initiative project, publication of the ACM Series, and the Governance Theme in the Landscape Mosaics project). (7/03-present)
- Principal Scientist/Team Leader – on sabbatical at Cornell University's Department of Natural Resources, Ithaca, New York, writing *The Complex Forest* and editing *The Equitable Forest*. (2/01-6/03)

- Team Leader, Local People, Devolution and Adaptive Collaborative Management, CIFOR. Planning and supervising the implementation of projects designed to develop mechanisms for cooperation and learning in forest management between local communities and other stakeholders, in partnership with junior scientists and graduate students from Asia, Africa and Latin America. (4/98 – 1/02)
- Principal Scientist and Social Science Coordinator for the project “Sustainable Forest Management: Testing Criteria and Indicators”, Center for International Forestry Research. Conducting tests on criteria and indicators for sustainable forest management, focusing on social elements of sustainability (particularly intergenerational access to resources and ‘voice’). (1/96 – 12/98)
- Natural Resources Management Specialist, Asian Wetland Bureau/UK ODA (now DFID) Conservation Project, Danau Sentarum Wildlife Sanctuary, Kapuas Lakes area, West Kalimantan. Facilitating collaborative wildlife management in the reserve, with indigenous groups (fishers and forest farmers) (5/92-7/93).
- Associate Professor, Sultan Qaboos University, Colleges of Agriculture/Fisheries and Health, teaching anthropology and helping plan and coordinate rural fieldwork in Omani fishing and agricultural communities on indigenous knowledge, maternal and child health, family planning and medicinal plants; conducting research on Omani childbirth and indigenous medical practitioners (1/88-6/90).
- Chief of Party, Farming Systems Researcher, Tropsoils Project, University of Hawaii (Rank: Associate Researcher). In addition to project management, I was responsible for providing the social science component of a Soil Management CRSP project in West Sumatra (including studies of nutrition, gender, agroforestry, indigenous knowledge, agricultural decisionmaking, and household income); coordinating interdisciplinary input; and serving as a liaison between project personnel and the farming families in a Transmigration site. (Researcher 11/82 - 8/85; Team Leader 8/85 - 7/86; on professional leave 11/86 - 11/88).
- Affiliate Researcher, East-West Resource Systems Institute. I worked with the “Energy for Rural Development Project” in writing a book on this topic; and with a project which looked at smoke pollution deriving from wood stoves in rural areas (10/82 - 10/83).
- Women in Development Specialist, HITAHR, UH (Rank: Assistant Specialist). I was responsible for helping the College of Tropical Agriculture and Human Resources strengthen its Women in Development capabilities. This included incorporating gender considerations into ongoing and new programs. I also coordinated the College-wide program to enhance and expand our farming systems expertise and experience, with some teaching responsibilities (funded by an AID Title XII Strengthening grant). 10/80- 11/82.
- Investigator, Indonesian-U.S. Man and Biosphere Project, “Interactions Between People and Forests in East Kalimantan”. My research was a development-oriented, ecological study of resettled shifting cultivators along the Telen River (Dayaks), including nutrition, land tenure, agroforestry and gender considerations. Financed by U.S. MAB Committee (funds from the U.S. Forest Service) and UNESCO, administered through East-West Environment and Policy Institute, sponsored by LIPI, Lembaga Biologi Nasional, and Mulawarman University, 9/79 -9/80.

- Co-founder, Board Member, and Executive Director, PACT: Social Analysts. I had responsibility for planning, coordination, and communications in this non-profit consulting and research firm composed of 13 female anthropologists interested in fostering the use of anthropological expertise in business and government (Seattle). I was involved in the preparation of several Environmental Impact Statements, 1/77 - 8/78.
- Co-Investigator, East-West Communications Institute. As part of a project to document successful family planning and development strategies in rural areas, I studied values and communication patterns related to family planning in a rural American logging community. My case study (published in 1977, reprinted in 1978) is a companion volume to a study of Korean Mothers' Clubs (Kincaid et al. 1975).
- On Site Researcher, Consultant, Abt Associates, Inc. I joined Project Rural in 1972. Funded by the National Institute of Education, Abt was selected to mount a five-year, multi-disciplinary documentation and evaluation of ten rural school systems involved in NIE's Experimental Schools Program. During three of those years, I resided in Quilcene, Washington (a logging and fishing community in temperate rainforest), documenting the progress of the local "experiment." The Final Report focuses on the mechanisms by which a rural community can diffuse and de-fuse a major Federal effort at change, 11/72 - 6/79.

Short Term Positions:

- Center for International Forestry Research, Anthropologist on a project to evaluate the suitability of four sets of guidelines for certification of tropical timber (field testing in Kalimantan, Côte D'Ivoire, and Brazil). Developing mechanisms for assessing the human dimension in these guidelines and proposing improved guidelines if necessary (12/94 - 12/95, 6 months).
- MBA International, Anthropologist for Coastal Environmental Management Planning Project (ADB). Identifying suitable sites for sustainable coastal development in Indonesia and helping determine benefits and costs of various development options (12/94 - 5/95, 1.5 months).
- AARD/Winrock/World Bank planning team for Agricultural Research Management Project II. Identifying mechanisms for bottom up input into Indonesia's national agricultural research, within new regional research/extension agencies (8-9/94).
- Development Alternatives Inc., Community Development Specialist. Training officials and recommending strategies for farmer involvement, in micro-watershed management on a soil conservation project in the Yogyakarta area (12/91-3/92).
- FAO, Community Forestry: Training junior Indonesian scientists in advanced rapid appraisal techniques; conducting research on land tenure and use among the indigenous Uma' Jalan of East Kalimantan; writing a monograph (published in 1993) on Uma' Jalan land use from 1962 until 1990. (2/91-10/91).
- North Carolina State University. Writing a book, building on research I conducted or coordinated on the TropSoils Collaborative Research Support Program (USAID) in Sitiung, West Sumatra (published in 1991), and drawing conclusions about future farming systems research approaches. (11/90 - 2/91).

- FAO. Developing "project profiles," as part of a large interdisciplinary team, to contribute to Indonesia's Tropical Forestry Action Plan. (7-8/1990).
- Associates in Rural Development, on USAID Natural Resource Management Project. Working on an inter-disciplinary team to plan community involvement in the project, in Central and West Kalimantan and in North Sulawesi (1-2/90), and developing a social impact analysis.
- P.T. Gondwana/Winrock, Upland Agricultural Conservation Project in watersheds in Central and East Java. Training Indonesian junior scientists in Rapid Rural Appraisal, documenting farmer perceptions of soil conservation, and suggesting mechanisms for farmer input into project research (4-5/88).
