

Eight years ago today, this country suffered from one of the most horrific attacks ever to take place on American soil.

2,973 people were brutally murdered, and that day created the "Post-9/11 World."

The "Post-9/11 World" is a world where we lose our civil liberties, where illegal pre-emptive wars are fought, where Executive Power is multiplied by 1000 with no accountability, and this country is bankrupted while the rich

become richer. If that day wasn't what we were led to believe, then we need to know about it, and we need to know about it now.

The 9/11 Commission was a disastrous failure. They were mandated to give a "full and complete accounting" of the "facts and circumstances" regarding the 9/11 attacks, and failed miserably. 1000's upon 1000's of good people have fought for the truth. Several family members have called for a new investigation, and have been ignored.

80,000 New Yorkers, as well as 100+ family members, survivors, and 9/11 First Responders endorse the nyccan.org effort. If you believe in truth and accountability, please do what you can to help get a new investigation onto the NYC Ballot. Thank you.
