

Certification and Authorization for Drivers

I have been requested to use my privately owned vehicle for transporting students to a parish-related activity. I certify that I possess a valid California Driver's License and that I have presently in force automobile liability insurance coverage of at least \$100,000 per person and \$300,000 per accident.

Persons who are requested to use their privately owned vehicle for student transportation to parish related activities should be aware that although there is a liability insurance policy for the diocese, it is the individual driver's own insurance that must provide the coverage for him/her in case of an accident.
