

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Fill in the oval beside the correct answer.

1. Light is energy that you can

Hear

See

Feel

Eat

2. Heat is energy that you can

Hear

See

Feel

Eat

3. Sound is energy that you can

Hear

See

Feel

Eat

4. Mechanical energy is the energy of

The Sun

Vibration

Muscle & Motion

Electrons

5. Light and heat from the sun is called
- Solar Energy                       Wind Energy
- Shadows                               Conduction
6. A common form of stored energy
- Vibration                               Battery
- Shadow                                  Lamp
7. Sound is energy that you can
- Hear                                       See
- Feel                                        Eat
8. Mechanical energy is the energy of
- The Sun                                  Vibration
- Muscle & Motion                       Electrons
9. This happens when light is blocked
- Vibration                               Reflection
- Closed Circuit                          Shadow

10. This happens when light is blocked

- Vibration                       Reflection  
 Closed Circuit                 Shadow

11. Something that is burned to make heat

- Vibration                       Conductor  
 Shadow                           Fuel

12. To bounce off something

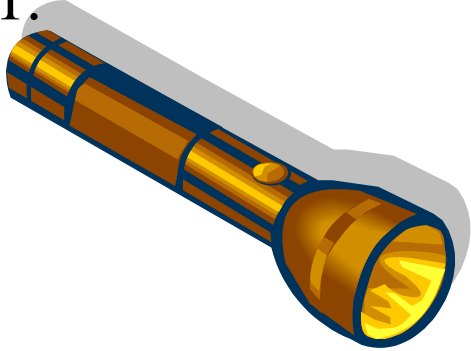

- Circuit                           Shadow  
 Reflect                           Conductor

13. Anything that can do work or cause change

- Energy                           Conductor  
 Reflect                           Shadow

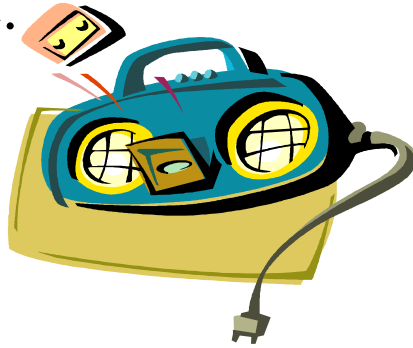

Circle the type of energy each object produces?

11.

Heat    Light    Sound

12.

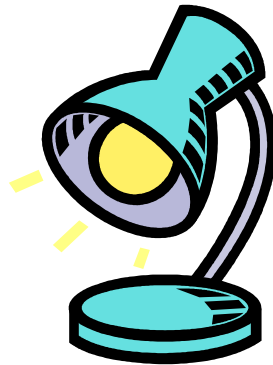

Heat    Light    Sound

13.

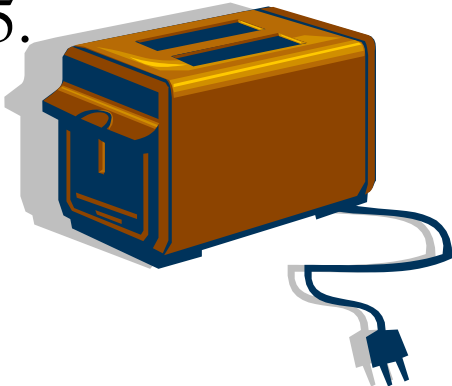

Heat    Light    Sound

14.

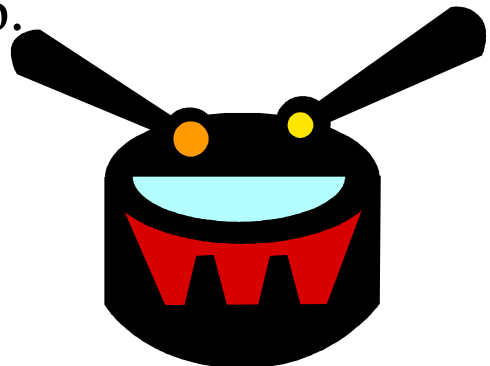

Heat    Light    Sound

15.

Heat    Light    Sound

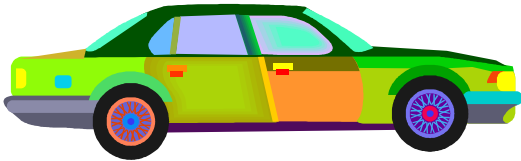

16.

Heat    Light    Sound

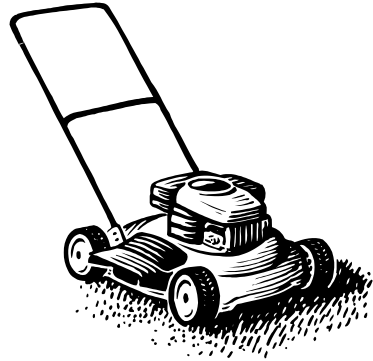

Circle the type of energy each object uses?

17.

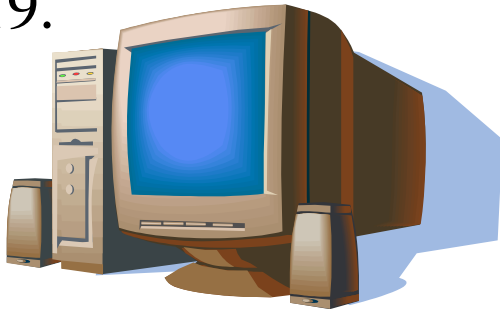

Electrical      Chemical

18.

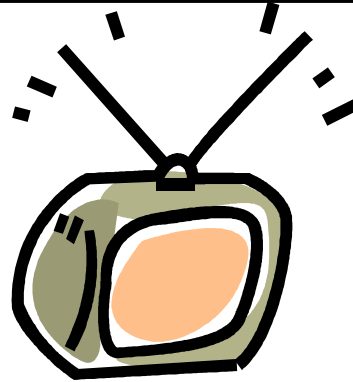

Electrical      Chemical

19.

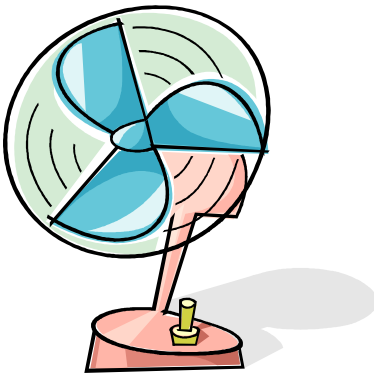

Electrical      Chemical

20.

Electrical      Chemical

21.

Electrical      Chemical

22.

Electrical      Chemical
