### Color Filled Etching \$3.00

Etched areas on glass platters may be color filled in gold or silver for greater visibility. Normal etching will have a frosted or white appearance and creates a beautiful finish on your platter.

### Additional Services

Custom artwork, logos and/or fonts may be available upon request. Please call for more information.

### Glass Platter Color Selection

For platter sizes that indicate color options, the following are available.

Blue, Green, Black, Yellow\*, Red

\*Color Filled Etching is strongly recommended on yellow platters due to the light color contrast.

Please note: Signed and/or Color Filled glass platters are not suitable for serving food. Ceramic platters, once oven cured per the enclosed instructions, may be used for light food service. All signed, unsealed glass platters should be cleaned using a soft dry cloth. Avoid abrasive materials or cleaners as this may damage guest signatures. For optimal preservation, it is recommended to seal signed glass platters with a non-yellowing glass sealant.
