About this Dictionary

I compiled this dictionary because at that time the community of Lingua Franca Nova did not have a type of dictionary that is good for printing. I hope that you will find that this dictionary is easy to read, and that it is usable.

To create this dictionary, I use OpenOffice.org and the "DejaVu Serif" font. OpenOffice.org is a free word processor, and "DevaVu Serif" is a free font that is very beautiful.

I hereby freely release this dictionary without a license; you may do with this as you want.

This is the fourth edition of the dictionary. It's basis is the official dictionary at 7 August 2007.
