

The AAACEI Delaware Valley Section Presents

“Cost and Issues of Producing Renewable Fuel”

Mark your calendars now for March 11, 2009

Tonight he will present a cost engineer’s view on the cost of producing ethanol and biodiesel from various feedstocks and the costs and issues of producing a new renewable fuel, bio-oil from various waste streams.

The talk will conclude with a discussion of the learning curve for renewable fuels and what we can expect in cost reductions in producing these renewable fuels in the future.

Andrew McAloon Bio

Andrew McAloon is a professional engineer and a certified cost engineer with an undergraduate degree in Civil Engineering from Villanova University and a Master in Business Administration from Robert Morris College.

Andrew has been with the USDA- Agricultural Research Service for over 15 years and much of that time has been involved analyzing the costs of producing various renewable fuels from agricultural materials to support renewable fuels research by the USDA.
