

Shelf Life - Brewing Additives

This information (pieced together from various suppliers) was transcribed from the *Winepress* forum (member: Ed Marks), then amended & revised by Highest:

Activated Carbon, Indefinite	Hydrogen Peroxide, 6-12 mos (refrigerated)
Alcohol, Indefinite	pH Buffer Solutions, 6-12 mos
Ascorbic Acid, Until yellow	pH Electrode Soak Solution, until moldy
Bentonite, Indefinite	Phenolphthalein, Indefinite
Cadmium Sulfate, Indefinite	Phosphoric Acid, Indefinite
Calcium Carbonate, Indefinite	Potassium Acid Phthalate, 2 Years
Chromatography Acid Standards, until moldy	Potassium Bicarbonate, Indefinite
Chromatography Solvent, 1 year (unopened)	Potassium Carbonate, Indefinite
Citric Acid, Indefinite	Potassium Metabisulfate (KMET), 1 year
Clinitest Tablets, 2-3 years	Sodium Hydroxide Solution, 6-12 mos.
Copper Sulfate crystals, Indefinite	Sucrose test solution, 1-2 mos (refrigerated)
Copper Sulfate solutions, 1-2 years	Superfood, 2 years
Diammonium Phosphate (DAP), 3 years	Tartaric Acid, Indefinite
Fermaid-K, 3 years	Vacuum Aspiration SO ₂ Indicator Solution, 3-6 months
Go-Ferm, 3 years	Yeast Hulls, 3 years
