From the
Oval Shack

Another year has rolled around and this is my last Oval Shack column because the new leadership team takes over next month. I have enjoyed the last year as the President of OARS again, and would like to thank my team,

Duane, WB7ROZ, Vice President, Chuck, K7VRE, Secretary, Ed, N7WW, Treasurer, and Larry, KC7CKO Member at Large, as well as the entire membership for the support that I have received this past year. I would also like to thank Tom, KA4VVA for his continued efforts to keep us with a meeting place. In the busy world of County Government, that is not always easy. Without the efforts of everyone involved, it would not have been as good a year.

I wish the best to our new team of Lee, K17SS, President; Sharon, N7SSD, Vice President; Tom, KE7EJJ, Secretary; Ed, N7WW Treasurer; and Larry, KC7CKO Member at Large. I know that they will do a great job of running the club for the next year. I know that they will appreciate any input that you can give them on direction and programs for the new year. Assistance is always greatly appreciated by the leadership.

At our last meeting, the membership passed the amended articles of incorporation which will allow us to become a Charitable Corporation in the eyes of the IRS, that is a 501(c)(3) Corporation. This could open new roads to us in seeking charitable donations and could help us move toward establishing a permanent club location and station.

Through the efforts of Lee, K17SS, and his support team we have another group of hams joining our hobby after passing the test on Saturday, Dec. 3. Be sure to congratulate them and welcome them to our hobby if you see them at a club meeting or hear them on the air.

We also need to thank Klaus, AC7MG, and his team for establishing a regularly scheduled VE Test Session and the VE Team. This not only helps to bring new members into the hobby, but also helps them to learn about our club.

Of course, we have to thank Fred, W7SIX, for his continued efforts to keep the hardware in our repeater system functioning so well, and also Duane, WB7ROZ, for programming the controllers. There is special thanks due to the Thurston County Sheriff's Office for providing the funding to allow us to have the repeaters located where they are. It would be a

large financial burden on the club if we needed to pay those costs ourselves.

We have had a good year financially — have taken in quite a bit from our tables at both the Mike and Key Hamfest in Puyallup and at Seaside. Thanks to everyone who donated equipment, time or both. Hopefully, we can exceed those results in 2006.

Have a safe and happy holidays. See you in 2006.

Reward Offered

Here is an oldie but goodie some of you may not have seen before.

A reward of 500 microfarads is offered for information leading to the arrest of the desperate criminal Hop-A-Long Capacity.

This unrectified criminal escaped from a primary cell where he had been clamped in ions, awaiting the gauss chamber.

He is charged with the induction of an 18 turn coil named Millihenry, who was found choked and robbed of valuable joules. He is armed with a carbon rod, and is a potential killer. Capacity is also charged with driving a dc motor over a Wheat-

stone bridge and refusing to let the band pass. If encountered, he may offer resistance. The electromotive force spent the night searching for him in a magnetic field, where he went to ground. They had no success, and believe he returned ohm via a short circuit.

He was last seen riding a megacycle with his friend Eddy Current, who was playing a harmonic.

— from David, ZL3AI, via packet

Holiday Potluck

The OARS 2005 Holiday Potluck will be held beginning at 17:00 on Saturday, January 7, 2006 at the Olympia Search and Rescue (OSAR) building at 9111 Yelm Highway SE, Lacey. This is on the right hand side of the road about 3.3 miles past the intersection of Yelm Highway and Ruddle Road.

Bring your favorite dish and we will provide paper plates and silverware. OSAR will provide hot coffee and tea. If you would like other beverages, please bring them.

Also, in past years, we have brought small gifts which are then auctioned off to bring some additional revenue into the club treasury.

See you there.

73,

— Ken, K7TAG

Amateur Radio Military Appreciation Day

The following message from KC9HAJ was emailed to OARS:

From: ARMAD / KC9HAJ <kc9haj@yahoo.com>

To: nt7h@arrl.net

Amateur Radio Operators have begun a unique way of showing support for our military veterans, and active duty members. Emery McClendon, KB9IBW, founded ARMAD — Amateur Radio Military Appreciation Day — as a way to allow the people of communities worldwide to express thanks and appreciation to those who serve in the military.

Since the inception of ARMAD in May 2004, ARMAD has grown at a rapid rate, with Amateurs joining in from locations around the world to spread messages of support during this “live” forum. It all started when amateurs from two local clubs decided to hold an event during Memorial

Day weekend at a local baseball stadium. Amateurs were able to set up radio stations inside and around the stadium to allow the fans a chance to say thanks to military members, and to show support to their families during the game. The idea took off with over 25 other amateur radio groups from around the US, and 7 international groups joining in the effort after hearing about the idea. The Fort Wayne, Indiana event at the stadium drew a crowd of over 6,600 people. Contact was made to several military bases, ships, and foreign military units serving as part of the Coalition Forces.

ARMAD 2005 involved over 100 locations worldwide, and troops from Iraq were on the air to listen to the members of our communities say thank you. These troops also responded, and let the world know how much it meant to them to hear our LIVE voices. Emails, and letters are great, but through the gift of Amateur Radio those who serve heard expressions of appreciation LIVE, and were also able to respond back with joy and thanks to us.

ARMAD expects to continue to grow, and invites amateur radio operators, clubs, local community members, and military amateur operators to participate in future events. Amateurs can help to bring awareness to our hobby by spreading the word about ARMAD, and setting up for these events at public venues. Together we can “ham it up for the troops.”

The next ARMAD event will be on May 27, 2006. For more information please visit <http://www.armad.net/>, and get involved.

Please post this information for your members, and consider a link to the ARMAD web page, Thank you.

— KC9HAJ

The Sermon

The sermon I think this Mom will never forget: “Dear Lord,” the minister began, with arms extended toward heaven and a rapturous look on his upturned face. “Without you, we are but dust.”

He would have continued, but at that moment my very obedient daughter (who was listening!) leaned

over to me and asked quite audibly in her shrill little girl voice, "Mom, what is butt dust?"

Radio Books for Dummies

Greetings,

My new book, "Two-Way Radios and Scanners for Dummies" has been released by Wiley Press. You may be familiar with my previous Amateur Radio title, "Ham Radio for Dummies" now in its second printing and one of the best-selling ham radio books ever.

"Two-Way Radios and Scanners for Dummies" covers different types of radios available to the private citizen, licensed and unlicensed. I explain the characteristics of the different services, using that type of radio equipment effectively, and how to get a license if need be. Scanning and shortwave listening are covered, including how to listen to "trunking" commercial and public-safety systems, military radio, and aviation channels.

Amateur Radio gets its own chapter and numerous references throughout the book. The book concludes with an extensive technical section on choosing and installing radios, batteries, and principles of elementary radio and electronics. There is a sample chapter at <http://www.dummies.com/WileyCDA/DummiesTitle/productCd-0764595822.html>.

Many hams use more than one type of radio — perhaps an FRS/GMRS handheld, a CB in the car, or a shortwave receiver or scanner at home. They will encounter these radios during public service and emergency work, as well. Reading this book will broaden any ham's perspective on radio and make for a more informed amateur. Emergency team leaders will find the book particularly useful as a resource for volunteers that need a little radio training, including hams. There's something new in the book for even the most experienced ham!

73,

— Ward Silver N0AX

OARS Net check-ins

The following stations checked in on the OARS General Information Net one or more times on the dates of 8,15, or 22 November, 2005:

AA7YD	AB7PS	K7GUH	K7OKC
K7TAG	K7VRE	KB7DFL	KB7ZDS
KC7FEE	KC7LA	KD6ZBS	KD7RAT
KD7TQW	KD7UJH	KD7UST	KE7EJJ
KI7SS	N7IVM	N7JHJ	NX6W
W7MRK	WB7ROZ	WC7I	

Net control stations for the month were WB7ROZ, K7TAG, WC7I, and K7VRE. Thank you for your support!!

The net meets at 7:30 every Tuesday evening on the 3 linked OARS repeaters: 147.36, 224.46, and 441.40 MHz. All Hams are invited to check in.

Let Me Rephrase That

Our friends, James and Florence, attend choir practice Wednesday evenings, and often head for a restaurant afterwards with their fellow choir members.

Florence soon noticed that every time she had a glass of wine, it was followed by a severe migraine headache. James agreed with her that it might be better if she abstained, and so she did.

On one post-choir occasion, however, Florence decided, after some hesitation, to try a different variety of wine. Some time passed with no consequences.

Then she waved happily across the big table where her colleagues all sat, and while holding up the empty wine glass announced in a loud voice, "James! I don't have a headache tonight!"
