Thank you for supporting shareware!

*** Installing Seating & Drilling ***

For WINDOWS Installation:

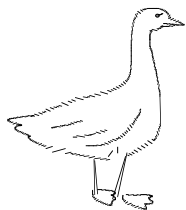

1. Startup WINDOWS
2. Open the file that you downloaded.
3. Double click on **install.exe**
4. Follow prompts. The default directory is that for *Gradebook Plus, Windows*. If you wish to install into another directory, make the change at the appropriate dialog. You will want *Easy Action* in the same directory as your gradebook program if you are using one.

For Macintosh:

If you are not using a gradebook program, you are ready to go.

If you are using a gradebook program, you will want *Mac Seat'em, Mac Drill, and Roster Master* in the same folder as is your gradebook program. Drag all the files that you downloaded into your gradebook's folder.

The Manual and suggestions are in the Help Menu.

Have Fun!
