Handgun Tactical Weapons Lights

Sure-Fire offers the end user these three types of systems:

1. The SUREFIRE Millennium Handgun Weapon Lights- A quantum leap in power! These 9 volt systems provide an amazingly bright 125 lumens for one hour or 225 blinding lumens for 20 minutes. These systems are made from aircraft grade aluminum and are truly an amazing piece of tactical hardware. The Millennium series can be waterproof if needed and these systems have hardware continuity with our Millennium Weapon Lights for rifles and our handheld special operations lights for-in-the field tactical needs. All systems are hard anodized for maximum resistance to the elements. Available with the ambidextrous SlimLine switch and the constant on shuttle switch or with the shuttle switch only.

2. The SUREFIRE Nitrolon Polymer (P) Series- These systems are lightweight and compact in size due to their unique side-by-side battery housing. The P-series Weapon Lights are offered with the ambidextrous slimline switch and a constant on shuttle switch for maximum tactical efficiency or with a constant on shuttle switch only. The P-Series lights can be removed instantly by pressing down on the locking tabs and sliding the light forward.

3. The Sure-Fire Classic System- This system has a dedicated housing that securely attaches to the gun and uses two 123A size lithium batteries to provide either 65 lumens of light for one hour or 120 lumens of light for 20 minutes. The classic systems come with our patented molded slimline switch that allows you to activate the light from the pressure pad on the pistol grip and is ambidextrous for tactical needs. Integrated into the housing is a constant on switch that is easily activated when constant light is desired.

** The Nitrolon and Millennium systems with the shuttle switch only can be removed from the handgun and put on a long gun (shotgun, carbine, or pistol) when using a Sure-Fire mounting rail.

S&W Tactical..Coming Soon!

Shotgun WeaponLights

Sure-Fire Integrated Forend WeaponLights for Shotguns

Sure-Fire makes replacement forends with integral tactical lights to fit all of the most popular shotguns available. These forends come with a pressure sensitive activation pad for momentary light use, or they are available with an optional constant On/Off switch (“F” models only). A P60 lamp assembly is standard, providing 65 lumens of light for one hour. The P61 ultra high output lamp assembly can also be installed in the shock isolated system. This boosts the power to 120 lumens for 20 minutes of run time.

Rifle, Carbine and SMG Weapon Light Systems

Millennium fore ends- All systems feature a disable switch for transportation, momentary pressure ON and constant ON switches. Some systems available with navigation LED's with independent momentary switch.

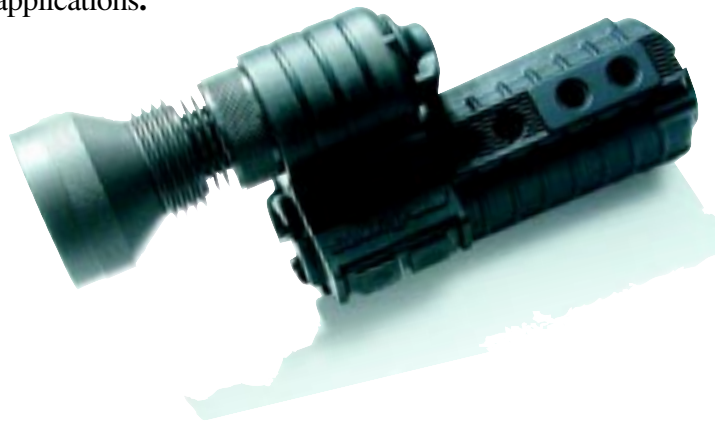

“A” series are powered by three lithium batteries providing 125 lumens (MN10 lamp) for 1 hour of run time or the 225 lumen (MN11) for 20 minutes of run time. Provided with a 1.625” diameter bezel. “A” series provides the optimum beam spread and power for CQB or in urban areas.

H&K G36 Shown

“AB” series are powered by three lithium batteries providing 125 lumens (MN10) for 1 hour run time or 225 lumen (MN11) for 20 minutes of run time. Designed with a 2.5” diameter bezel allowing extended range and pre-focused spot for perimeter deployment applications.

Colt 500 AB Shown

“B” series are powered by six lithium batteries providing an 250 lumens (MN20) for 1 hour of run time or a blinding 500 lumens (MN21) for 20 minutes of operational light. Ideal for maritime use or rural applications where distances are longer and more light is required.

LITHIUM BATTERIES

6 Volt Lithium Battery	DL223AC	14.00
9 Volt Lithium Battery	DL323AC	19.00

FILTERS, COVER, & BEAMSHAPERS

The listed filters provide you with the ability to alter the light to fit on your tactical needs. The filters can be flipped open to instantly provide white light when needed. The BeamShaper will adjust the flashlight beam for a broader more diffused coverage for close up work, or for when an intense tight focused beam is not desired. The cover allows for the light to be stored with no chance of damage to the lens and can be flipped open when white light is needed. Some of the new millennium model filters feature a Pyrex lens and all have our new positive locking closure to ensure the filter stays in place during tactical operations. FM13-17 fit the "A" Series, FM23-27 fit the "AB" and "B" Series.

Rifle, Carbine and SMG Weapon Light Systems

Millennium Vertical Foregrip System (Rail Mount)

This is a shock isolated 9 volt system that provides both a bright white light for target ID or force-on-force use in addition to a pair of L.E.D. navigation lights calibrated to be useful without compromising the operator. These are ideal for stealth approaches or breaching. The Millennium Vertical Foregrip System fits the Knight's Armament RIS/RAD, any Picatinny Rail, or any rail that accepts an M952P/SWAN Lever Mount. The main light has two pads for momentary activation and a switch for constant light. The navigation lights operate momentarily through a pressure-sensitive thumb switch. Available for Colt Carbine, Colt Rifle, H&K-MP5SD, G36, G36K, and UMP40/45 Picatinny Rail interface.

Rifle, Carbine and SMG Weapon Light Systems

Millennium Universal Tactical Light System-

These six or nine volt shock isolated light systems designed to fit on the current RIS/RAD or any picatinny/ Weaver rail system for both carbines and rifles. The systems feature interchangeable modular construction. Options include momentary push ON, momentary pressure tape and constant ON switches. The systems offer two mounting options, the SWAN throw lever mount and SUREFIRE's dual thumbscrews.

M95__series are powered by two lithium batteries providing 65 lumens (P60 lamp) for 1 hour of run time or the 120 lumen (P61 lamp) for 20 minutes of run time. Supplied with a 1.375" diameter bezel. This 6- volt series for the last fifteen years has been the industry standard for military and law enforcement.

M96__series are powered by three lithium batteries providing 125 lumens (MN10 lamp) for 1 hour of run time or the 225 lumen (MN11) for 20 minutes of run time. Supplied with a 1.625" diameter bezel. This series provides the optimum beam spread and power for CQB or in built-up urban areas.

M97__series are powered by three lithium batteries providing 125 lumens (MN10) for 1 hour run time or 225 lumen (MN11) for 20 minutes of run time. Supplied with a 2.5" diameter bezel providing extended range and a pre-focused spot for perimeter deployment applications.

Rifle, Carbine and SMG Weapon Light Systems

Classic Barrel-Mounted Modular Weapons Light Systems

Designed to mount directly to the barrel or suppressor of both carbines and rifles. This system is intended to allow adding the tactical advantage of a SUREFIRE light to weapons that have not been outfitted with any rail-type systems.

Classic 600 Series

Classic 600 Series Lights provide 65 lumens (P60 lamp) for 1 hour of run time or the 120 lumen (P61 lamp) for 20 minutes of run time. The 600 Series Lights have been the standard in military and law enforcement for the last fifteen years.

Classic 900 Series

The Classic 900 Series nine volt systems are the new standard. The MN10 Lamp assembly gives 125 lumens for a full hour, or the MN11 Lamp Assembly provides 220 lumens for 20 minutes. Supplied with a 1.625" diameter bezel, the 900 delivers optimum beam spread and power for CQB and urban operations.

Rifle, Carbine and SMG Weapon Light Systems

Classic Front Sight Post Mounted Modular Systems- Designed to mount securely to the front sight post of Colt carbines and rifles. The mount is offset to the right of the weapon.

Classic Modular Charging Tube Plug Mounts- Designed to mount light systems to H&K MP5 series weapons and rifles that are not equipped with a dedicated forend light assembly.

Classic Series Dedicated Forend Weapon Lights- Replaces the existing forend used on the H&K MP5 series. These housings are dedicated forends. They are available with the momentary-light pressure switch only, or can be ordered with an optional constant ON switch.
