Review of *Liberal Hearts and Conservative Brains*

"Mixing personal history and intellectual analysis, Lipsman has created a matrix for examining the divide between liberal and conservative. No matter whether you lean left or right, you will gain insight, recall historical keys to your political thinking and develop some original thoughts while enjoying the author's own journey. It's a guide to understanding how and why each of us has reached the political positions we choose, how they change over time and how those choices are affected by our professional environment."
