FOR EOC PROJECTION

simplifying
**Emergency
Management**

Experience in the trenches keeps us focused on the "boots in the field." The State or fed may require to use other software. You'll use SCB Software for yourself. It's easy to use and flexible, and helps you document your incident management and response by providing historical data you can easily merge in an after action report. This cost effective software is designed and used by someone with years of experience in the field.

- Eighteen years in county emergency management.
- Eight years in 9-1-1.
- Twenty years in fire fighter service.
- Twenty years in local emergency planning committee service.

BECAUSE DURING AN EMERGENCY,
NO ONE HAS TIME TO LEARN SOFTWARE.

Management software that works for you.

EMERGENCY MANAGEMENT DATABASE.

Simple Software Solutions for Emergency Management.

Flexible and light weight, it can run on a laptop in the field, such as an on-scene incident command post. Our goal is to provide simple software solutions you can use. After all, during an emergency, who has time to learn a computer program?

simple solutions for your needs

EMERGENCY MANAGEMENT DATABASE

Our cutting-edge management tool provides fast and easy access to information on agencies that provide emergency services, and quickly locates and highlights the resources you need. The program includes event logging tools to manage incidents; including tracking messages, radio traffic, location involvements, tasks, unit status, shelters, and facilities, resources, supplies and their deployment. Incident Command System and Emergency Operations Center charts allow you to visually track changes to the Incident Command and EOC structure and quickly make assignments with a point and click. The program includes 2008 Emergency Response Guidebook data, including isolation and evacuation distances. Numerous reference documents and forms can be viewed on screen or printed for distribution. The software is network compatible, so changes made at one workstation appear at all others.

REQUIREMENTS

- MICROSOFT WINDOWS PC
- 100 MB DISK SPACE

UNPARALLELED SUPPORT

- NO MAINTENANCE FEES—THAT SHOULD MAKE YOU SMILE

RESOURCE DIRECTORY

Quickly locate agencies with the equipment you need.
