

**FROM CONGRESSMAN SARBANES
FOR STEP IT UP 11-3-07**

**SUBJECT: Statement from Congressman Sarbanes for
StepItUp in Columbia MD**

"Global Warming is one of the greatest threats facing the nation and the world. If we are to reverse its effects we must work collaboratively and act immediately. Along with pushing for laws that promote energy conservation and renewable alternatives on a broader scale, we need to take it upon ourselves to change practices and behaviors that are the cause of this phenomenon." said Congressman John Sarbanes.
